## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments with respect to claims 8-14 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 103***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 11-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over USP 6,290,302 ('302) in view of USP 6,764,142 (kwon).

Figures 10-13 illustrate the step of inserting non-tapered portions of bristles into through holes of a head insert (10). Figures 23 and 24 show the step of thermally fusing the ends of the bristles protruding from the bottom of the head (10). Figure 27 show the head (10) with bristles being fixed to the head of the toothbrush (5). The reference discloses that the head insert can be attached to the head of the toothbrush using ultrasonic welding (col. 2, lines 45-52).

The reference is silent as to the chemical composition of the brush and that the bristles or tapered on one end.

Kwon discloses a method of making polyester bristles being tapered on one end for use in a toothbrush (abstract, Kwon). Specifically, figure 5 shows a bristles diameter of 0.02mm and figure 6 shows a diameter of 0.06mm.

The reference further discloses grinding the tips of the bristles after the bristles are secured in the toothbrush head (col. 3, lines 55-67).

Art Unit: 1744

Also, Kwon discloses that it is well known to cut and abrade the bristles to form a tip as defined in claim 11 (col. 1, lines 40-47).

Kwon discloses the advantages of the bristles are proper flexibility and softness, improved feeling while brushing and excellent scaling ability (abstract, Kwon).

Accordingly, it would have been obvious to one skilled in the art to use the bristles disclosed in Kwon in the method of making a toothbrush as disclosed in Park in view of the advantages and benefits of the bristles disclosed in Kwon.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
